Language of Document: NotAvailable **Abstract:**

PURPOSE: To prepare a polyethylene porous film or sheet excellent in mechanical strength.

CONSTITUTION: This porous film or sheet is obtained by forming a film or sheet from a composition comprising an ultrahigh mol.wt. polyethylene having a viscosity-average mol.wt. of ≥ 800000 , a polyolefin having a viscosity-average mol.wt. of ≤ 600000 , and a plasticizer, and subsequently extracting and eliminating the plasticizer.

Legal Status: There is no Legal Status information available for this patent
